

ELECTRONIC-ENERGETIC STRUCTURE
OF COMPOUNDS EuNi_2Si_2 AND EuCu_2Si_2

S u m m a r y

The electronic structure of ternary silicides EuNi_2Si_2 and EuCu_2Si_2 is examined, and *K*- and *L*-bands of silicon and copper combined on a common energy scale are obtained. The special changes are observed in the region of the Fermi level for compound EuCu_2Si_2 .
