

THE APPROXIMATION OF ENERGETIC  
DEPENDENCES OF MASS ATTENUATION  
COEFFICIENTS OF  $\gamma$ -RADIATION FOR CsI  
AND ZnSe SCINTILLATORS

S u m m a r y

The formulae for energetic dependences of the mass attenuation coefficients of  $\gamma$ -radiation of CsI and ZnSe scintillators in the range of energies of 0.01 - 100 MeV are found. The difference of approximative dependences from the source data is less than 3%.
