

COMPARISON OF APPROXIMATE TO EXACT  
NEXT-TO-NEXT-TO LEADING ORDER  
CORRECTIONS FOR HIGGS  
AND PSEUDOSCALAR HIGGS  
BOSON PRODUCTION

S u m m a r y

Recently obtained NNLO exact corrections for Higgs and pseudoscalar Higgs boson production in hadron colliders are compared with approximate ones. As shown before, it is found that there is a range of a proper variable where these corrections differ little.
