

STRUCTURE MODIFICATION OF  $K_2SO_4$   
CRYSTALS BY INSERTING  $ZnCl_2$  ADMIXTURE

S u m m a r y

X-ray structure and Raman scattering studies of crystals grown from the aqueous solution of  $K_2SO_4$  and  $ZnCl_2$  salts have been carried out. The influence of X-ray irradiation on the optical properties of those crystals has been considered.
